

ML-INFN Dashboard

Welcome!

This is the home page of the ML-INFN project "**approccio end-to-end all'utilizzo del Machine Learning per le linee di ricerca INFN**"

You can use this knowledge base to capture best practices and address common problems.

The ML-INFN Confluence Space is organised as follows:

1. The Knowledge Base, with fully explained and working use cases of Machine Learning [LINK](#)
2. The list of public datasets available for the use cases [LINK](#)
3. Indico page of the ML-INFN meetings [LINK](#)
4. Page with hackathons organized by ML-INFN [LINK](#)
5. Page with known training opportunities (linked to ML-INFN or not) [LINK](#)
6. An introduction to the available resources, how to request access and how to obtain them [LINK](#)
7. A link to the ML-INFN top category in the INFN Issues System, based on Jira [LINK](#)
8. The ML-INFN project, internal pages [LINK](#)

If you want to contact the ML-INFN, you can use:

- Contact the Principal Investigator, [Lucio Anderlini](#)
- Contact all the ML-INFN researchers (please note, this is potentially tens of persons) ml-infn-csn5@lists.infn.it
